

Maisons du Monde' individual commitments to act4nature international

Furniture and home décor designer and retailer Maisons du Monde has been pursuing its CSR strategy «Committed Together» for 10 years. Our biodiversity policy is based on the main impacts identified in our monitoring plan and presented in Section 3.4.5 of the DPEF (Déclaration de Performance Extra-Financière — statement on extra-financial performance: <https://corporate.maisonsdumonde.com/fr/file-download/download/public/14461>).

- The impact of the natural raw materials used by our suppliers, starting with wood, the main material used in furniture,
- The impact of our own activity, in particular how we contribute to the artificialisation of land (covering natural areas with artificial surfaces), our greenhouse gas emissions and the packaging waste generated by our activity,
- A positive impact through Maisons du Monde Foundation contributions to preserve trees and forests and raise awareness among our customers.

The Executive Committee has validated these commitments, which have been incorporated into the Group's 2020-2024 Strategic Plan, presented to the financial markets in 2020.

1 Raw materials and manufacturing of our products:

2024 Commitments

Routinely analyse the vulnerability and impact of each natural raw material used in our products.

80% of our wooden furniture from certified or responsible sources (FSC®, PEFC™, recycled wood or wood traced through the NGO Earthworm Foundation).

30% of our textile products from responsible sources (recycled or GOTS-certified fibre).

100% of at-risk strategic suppliers audited on environmental issues (local pollution, water management etc.)

More information on our wood and natural materials purchasing policies is available at: <https://corporate.maisonsdumonde.com/en/les-piliers-de-notre-engagement/purchase-partners> and in Section 3.2 of the DPEF.

2 Activities within our network:

2024 Commitments

Formalise a policy to reduce the impact of our locations (shops, warehouses and offices) following the «avoid, reduce, compensate» logic for all Group projects, even in the case of leasing.

Develop a systematic «biodiversity contribution» linked to the impact of opening leased shops, to fund local biodiversity-preservation actions.

Reduce the carbon intensity of our activities by 25% (Scope 1, 2 and 3) in tCO_{2eq}/€ of turnover.

Ensure that all packaging distributed can be recycled.

3 Positive contribution:

2024 Commitments

Dedicate at least 0.08% of the Group's annual revenue to supporting trees, forests and biodiversity.

Raise awareness among employees and customers about the importance of forest and biodiversity conservation through the ARRONDI en caisse campaign—where customers round up their payments to donate the spare change to the cause—and the Aux Arbres initiative (<https://aux-arbres.com/>)

4 Measuring progress:

2024 Commitments

Create and monitor suitable indicators for different stages in the value chain.
