Total Group's individual commitments to act4nature international

Total is a broad energy company, which produces and distributes fuels, natural gas and other related products. Over 100,000 employees are committed to energy that is better for our planet and for the world's economic development, with a vision to contribute to a climate neutral world in 2050.

Aware of the need to protect nature, on which humanity depends, Total has adopted commitments in the context of act4nature international in order to account accurately all its activities. This ambition has been formalized in the Net Zero by 2050 plan published in 2020.

For the Group, the Net Zero by 2050 plan is consistent with the recommendations of the United Nations' Sustainable Development Goals (SDGs), including those related to biodiversity. The Group also published its climate ambition, the Net Zero by 2050 plan in the International Finance Corporation (IFC) ‘s Green Bond handbook in 2020.

Total has endeavoured to formulate commitments that meet SMART criteria as required by act4nature international. These commitments will be the subject of a detailed annual reporting starting the first quarter of 2021. This reporting will also communicate the results of these biodiversity co-benefits. Total will publicly communicate the results of these biodiversity co-benefits.

Notice of dissent from NOSG, Nest, WMF French and Total: Group individual Commitments

Total has rung the bell of the International Finance Corporation (IFC) urging it to consider the individual commitments from the french companies: Total, ENGIE, Saint Gobain, to be included in the IFC’s SFICD. Total is ready to provide the Group of any information necessary for the IFC to take the right decision.

Total's answer to the Steering Committee of September 11, 2020.
